

## Machines Generating Huge Interest at the RWM 2013

We were very excited to offer visitors the chance to see three machines from our brand new Automate to Save range at the RWM exhibition last week 10-12 September at the NEC Birmingham.

We had the World's only self-loading vertical baler the AutoLoadBaler on our Stand 17 C61, whilst the original Mobile Roll Compactor, the Packmat (which cuts 50 Bins Per Week down to 15) and the Paktor Mi3 were on display outdoors.

**The Paktor Mi3 compactor was looking rather smart thanks to its clever side and back branding panels.**

**Paktor Mi3** – Patented 3 Aligned Cylinder Compactor That Packs a Punch and Provides Free Marketing Space. It also has a unique design that means the press plate pushes straight onto the waste applying more compaction pressure.
